Letter of Recommendation

I would like to give my strong recommendation for Benny Tieu. I came to know Benny in my database course (DD1368). Benny struck me as one of the leading students in the course immediately; based on the intelligent and constructive questions he posed during lecture, it was clear that he gained a quick mastery of the subject matter.

My next contact with Benny was in the thesis course (DD143X). Benny and his partner did a very good job on their Bachelors Thesis, *Implementation and Evaluation of a Recommender System Based on the Slope One and the Weighted Slope One Algorithm*. Benny is a pleasant and talented student. I have every expectation that he will achieve strong success in the future.

Feel free to contact me if you have any questions.

Yours sincerely,

Michael Minock
Associate Professor
